

What is the appraisal, will it give me answers?

This appraisal is not part of the research - it is a look at what needs doing and what has been done, the reliability of the resources already viewed, and whether the resources needed to progress the work are available. In some cases the resources needed to break through a brickwall or to prove a fact do not survive. If this is the case there is nothing that can be done. I will not take on work if there is no possibility of it being completed
