

Family Tree package

This is a five generation family history. Starting with yourself – or another named person – the direct ancestors are researched. This results in sixteen great great grandparents at the oldest end of the chart and usually spans 200 years.

The resulting family history can be presented in many ways – as a PDF document for you to deal with as you wish; as a printed out loose leaf book/folder to which you can add your own ephemera as you continue to find out about your ancestors; or as a fully bound family history book. The PDF document and family tree incurs no additional cost but both the printing out and the bound book will, depending on current market costs.
